

Name _____

Date _____

Changing Climate / Changing Habitats

The organisms discussed in the video are:

- Edith's checkerspot butterfly
- Culex mosquitoes
- Anopholes mosquitoes
- Polar bears

Choose one of the organisms and answer the following:

1. How is a changing climate affecting this organism?

2. Explain why a changing climate is having this effect.

3. What are the potential consequences of the effect on this organism for other organisms (including human beings)?
